Mel'nikov, N. I.
IN REGARD TO REGIONALIZATION OF VARIETIES (WHEAT) (K Voprosu o Rayonirovanii Sortov).
5 Jan 61, 5p. Trans. A-1230.
Order from LC or SLA mi$1.80, ph$1.80 61-15853

Trans. of Selektsiya i Semenovodstvo (USSR) 1956, v. 21, no. 5, p. 47-48.

The practice of [illegible] the prospective yielding capacity of wheat varieties is unsatisfactory because there is a great difference between the standard of agrotechnique used on the fields of selection establishments and of varietal plots and the general level of agrotechnics in agricultural production. In the regionalizing of new varieties of winter wheat it is more correct to proceed from data of the yield, which was obtained from plots with the non-fallowed background which corresponds in fertility to the high agricultural background under production conditions; in testing over a high agricultural background varieties are brought to light, which can be recommended for the leading farms.

Garanina, L. S.
BRINGING VALUABLE SPECIMENS OF VETCH-LING INTO SELECTION (Privlech' v Selektsiyu Tsennye Obrazzy Chiny) tr. by A. Neal. [1962] [6]p. (foreign text included). [CSIRO] Trans. no. 5840.
Order from OTS or SLA $1.10 63-13235

Trans. of [Selektsiya i Semenovodstvo] (USSR) 1961 [v. 26] no. 1, p. 52-53.

DESCRIPTORS: *Plants (Botany), Cereals, Albumins, Selection.

Vetchlings are cultivated for hay and green feed for cattle and pigs. Because of its comparatively short vegetative period, the vetchling is used as a fallow crop and can also be grown for acquiring seeds. An investigation of about 400 samples of
